## WORK EXPERIENCE

### REACT / REACT NATIVE DEVELOPER

CIKLUM WESTERN EUROPE / BRATISLAVA, SLOVAK REPUBLIC / MAY 2022 - JUNE 2023

While working as a frontend developer, I have participated in these projects:

#### Mobile app for Interfex:

**Description of the project:** A React Native app written in Typescript connected to new middleware and a complex network of backend solutions on the Interfex side, with a focus on accessibility.

**Description of activities:** Programming UI with React Native and connecting it to the backend, presenting progress to clients, design file familiarization, and providing feedback, participating in technical meetings.

#### Hakkastack:

**Description of the project:** A robust internal system used by the entire workforce, consisting of a REST API written in JavaScript in Node.js and a web frontend written in Typescript in React. **Description of activities:** Building UI for complex forms and data tables, working extensively with controlled forms using React Hook Form, refactoring older components to use Ant Design, performing MariaDB database structure modifications, and executing Sequelize ORM database migrations.

#### CN company website:

**Description of the project:** Company website built with Next.JS and React, where UI components, styled using the Emotion library, are grouped into paragraphs. These paragraphs are identified by unique IDs and can be accessed using a CMS.

**Description of activities:** Building new UI features, creating and managing paragraphs, collaborating with the backend team to establish data structures, crafting .story files for Storybook interactivity.

Some of my responsibilities included:

- Developing and maintaining responsive web and mobile apps.
- Creating modular components for scalable code.
- Collaborating with cross-functional teams.
- Optimizing performance and code quality.
- Engaging in code reviews.
- Staying updated with the latest technologies for ongoing innovation

### FRONTEND DEVELOPER

FRONTEND DEVELOPER / BRATISLAVA, SLOVAK REPUBLIC / MARCH 2019 - MAY 2022

During this period, I successfully created numerous websites. Most of these projects involved building websites from scratch, utilizing technologies such as Sass, CSS3 animations, jQuery and React.

My responsibilities spanned the entire web development process, from initial client consultations to understanding their requirements, crafting site logic, implementing responsive designs, and ensuring on-time project delivery. (for more detail visit <https://www.mikeit.site/digitalCV/freelance>)

## EDUCATION

### BILINGUAL PROGRAM IN ENGLISH LANGUAGE

Gymnazium Pakuchova 6  
Bratislava, Slovak Republic / 2013 - 2018
